ILYA HVOSTENKO

Frontend & Full-Stack Engineer

Ashdod, Israel | +972 52 481 7204 | ilyajavadev@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Frontend-focused Engineer with deep expertise in **TypeScript, React 19, Next.js 16**, and complex, data-dense interfaces. Brings a unique, high-reliability background rooted in **IDF Naval Operational Command (Squadron 916 War Room)**, enterprise **Terminal Operating Systems (TOS) at Ashdod Port**, and automotive electronic diagnostics at **Scania**. Combines disciplined systematic troubleshooting and state-management rigor with 2 years of Java Full-Stack training. Creator of deployed FinTech analytics terminals, interactive 3D WebGL configurators, and commercial multi-lingual web systems with native Hebrew (RTL) support.

TECHNICAL SKILLS

Frontend Core:	**TypeScript**, **JavaScript (ES6+)**, **React 19**, **Next.js 16 (App Router)**, React Native, Tailwind CSS, shadcn/ui
State & Data:	**Zustand**, **Redux Toolkit**, **TanStack Query (React Query)**, Context API, Client/Server Caching, WebSockets
Graphics & Motion:	**Three.js**, **React Three Fiber (R3F)**, Drei, **GSAP (ScrollTrigger)**, Framer Motion, PBR Shaders, Canvas 3D
Backend & Cloud:	Node.js, **Java (Spring Boot)**, MongoDB, PostgreSQL, REST APIs, Inngest Workflows, Git/GitHub, Vite, Vercel
Specialized & UX:	**Hebrew (RTL) Localization**, Web Accessibility (WCAG / a11y), Real-Time Telemetry & Dashboards, CAN-bus / ECU Diagnostics

FEATURED SOFTWARE ENGINEERING PROJECTS & COMMERCIAL WORK

PulseQuant — Full-Stack AI Market Intelligence Terminal 2025 Live Demo ↗ GitHub ↗

Next.js 16 • TypeScript • MongoDB • Gemini AI • Inngest Workflows • Finnhub API • Tailwind CSS

- Architected an institutional-grade stock intelligence platform featuring paper-trading portfolio with real-time mark-to-market P&L and asset allocation.
- Orchestrated asynchronous background jobs using **Inngest** to generate daily automated financial digests powered by **Gemini AI**.
- Built dynamic watchlists with price triggers, live NYSE/NASDAQ market session countdown timers, and keyboard-driven ⌘K command navigation.

NexusFi Pro — Institutional Crypto Intelligence & Telemetry Terminal 2025 Live Demo ↗ GitHub ↗

React 19 • Next.js 16 • TypeScript • TradingView Lightweight Charts • CoinGecko API • shadcn/ui

- Integrated high-performance **TradingView Lightweight Charts** for interactive candlestick OHLC telemetry and technical analysis.
- Engineered multi-currency asset heatmaps and quantitative simulation tools: Dollar-Cost Averaging (DCA) and dynamic market-cap what-if calculators.
- Designed optimized client-side state caching with zero-flicker re-renders across high-frequency crypto price feeds.

Lev Group — Commercial Corporate Platform (Production) 2024 Live Site ↗ GitHub ↗

React • Tailwind CSS • i18n Localization (RTL/LTR) • Web Accessibility (a11y) • Responsive UI

- Delivered a commercial web platform for an Israeli property management firm featuring full **Hebrew (RTL)** alongside English, French, and Russian.
- Engineered seamless bi-directional layout synchronization, WCAG accessibility compliance, mobile-optimized UX, and interactive lead routing.

ATELIER 3D — Interactive WebGL Apparel Studio & Configurator 2025 Live Demo ↗ GitHub ↗

React 19 • Three.js • React Three Fiber (R3F) • Drei • Valtio • Framer Motion

- Developed an in-browser 3D configurator with real-time PBR fabric simulation, procedural bump mapping, and custom decal raycasting.
- Engineered smooth 60fps lighting presets, camera state transitions, undo/redo state stack, and exportable production tech-pack specs.

PROFESSIONAL & MISSION-CRITICAL OPERATIONS EXPERIENCE

Scania Israel — Diagnostics & Electronic Systems Specialist 2025 – Present

- Perform computerized system diagnostics, ECU software parameter calibrations, and **CAN-bus network troubleshooting** using Scania SDP3.
- Apply rigorous engineering root-cause analysis to trace intermittent electrical, sensor, and communications faults under critical operational deadlines.
- Translate complex mechanical/electrical schematics into methodical diagnostic sequences, ensuring 100% operational safety and compliance.

Ashdod Port — TOS Operations Division — Terminal Operating Systems Specialist 2024 – 2025

- Operated mission-critical **Terminal Operating Systems (TOS)** in Israel's premier maritime port, coordinating high-throughput container routing and ship discharge plans.
- Managed real-time synchronized dispatch across crane operators, engineering units, and yard logistics under intense round-the-clock timelines.
- Conducted user-acceptance testing and evaluations of updated TOS software modules, identifying UI/data bottlenecks and submitting optimization reports.

IDF Navy — Squadron 916 (פלגה 916) — Naval War Room & Operations Coordinator (חמ"ל קמ"בציה) 2018 – 2021

- Served in the primary 24/7 Naval Operations Command Center (War Room) securing Israel's southern maritime theater and critical offshore infrastructure.
- Operated secure tactical command displays, encrypted radio communications (COMSEC), and live radar tracking to coordinate fast-response patrol craft.
- Executed operational protocols during high-stress emergency alerts; cultivated unmatched composure, situational awareness, and precision under pressure.

EDUCATION & MILITARY SERVICE

Tel-Ran Educational Center — Full-Stack Java Software Development (2-Year Program) 2020 – 2022

- Comprehensive CS curriculum: OOP (Java, Spring Boot), Data Structures, Algorithms, Relational & NoSQL databases, RESTful APIs, React & TypeScript.

Full Military Service (שירות צבאי מלא) — IDF Israeli Navy (חיל הים, פלגה 916) 2018 – 2021

Full Israeli Matriculation (תעודת בגרות מלאה) Ashdod, Israel
